Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

CLAIMS 35-40 ARE PRESENTED FOR EXAMINATION

DETAILED ACTION

OBVIOUS DOUBLE PATENTING

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 35-40 are rejected under the judicially created doctrine of double patenting over claims 1-39 and 1-16 of U. S. Patents No. 5,447,939 and 5,801,184, respectively, since the claims, if allowed, would improperly extend the "right to exclude" already granted in the aforesaid patents.

The subject matter claimed in the instant application is fully disclosed in the patents at column 1, line 56 to column 5, line 57 of 5,447,939 and column 4, line 51 to column 5, line 54 of the 5,801,184, respectively, and is covered by the claims in the patents since the patents and the application are claiming common subject matter, as follows: the claims in the application are generic to the species claims in the patents. This obvious type double Patenting rejection is deemed proper.

Art Unit: 1617

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 35-40 are rejected under 35 U.S.C. 102(b) as being anticipated by Sham et al. (5,151,438).

Sham et al. teach at column 15, lines 14-49 applicants' claimed inosine pranobex is known to be an immunomodulator and can be administered in cocktails to treat AIS or an HIV infection.

Applicants' claims are drawn to a pathological pathway in the in-vivo production of neurotropic growth factors in mammal.

That applicant may have determined a physiological pathway by which the active ingredient gives the pharmacological effect does not alter the fact that the compound has been previously used. The claimed effect would be inherent in the administration of the applicants claimed inosine pranobex as taught by the reference, i.e., there would be an in-vivo production of neurotropic growth factors.

None of the claims are allowed.
